SLIM 70

The new Slim range is designed to promote installation on vehicles with small interiors. Its vertical development allows for large internal space similar to a domestic refrigerator.

Slim 70 has 70-litre capacity and is fitted with a LED display with Power Saving and Silent Night modes, customised door panel with reversible opening, and a handle with a lock for ensuring ventilation when the fridge is off. The easy-fix system allows a simpler and faster built in installation than the traditional system.
